

# **European Institute for Security and Environment, z.s.**

## **About us**

European Institute for Security and Environment, z.s. is a self-governing, voluntary, non-political and non-profit organization bringing together those who are interested in security and environmental issues.

Evropský institut pro bezpečnost a životní prostředí, z.s.

# Goal

Our goal is to support society's interest in security and environmental topics in the Czech Republic, but also in Europe, to establish a public and professional discussion on these topics and to seek long-term sustainable solutions. Another goal is to transfer experience and best practices between EU member countries, to connect professionals of EU member and candidate countries in cooperation with foreign embassies, and at the same time enter into EU legislative processes.

The main objectives include:

- Research, publication and educational activities
- Organizing events and supporting professional discussion (conferences, round tables, seminars, workshops, working groups, events, etc.)
- Networking and establishing contacts with relevant partners in the public sector
- Promotion, support and cooperation with the media on our expert opinions
- Other activities related to our mission

# Vision

Our vision is an European society aware of it's need to be secure and capable of long-term sustainable economic growth while preserving the quality of the environment.

The main motivation for our work is the idea of shared responsibility and ability to face current security threats and the risk of irreversible devastation of the environment and climate. It is very important for us to cooperate with public, state and professional institutions in the Czech Republic, but also in other EU member and non member countries.

# Activities

## Educational activities

- public and private lectures and discussions, conferences and professional seminars on the given topics
- professional trainings, teaching professionals in the field of security, crisis management and environmental protection
- documentation, publication, popularization and publishing activities
- creation of educational policy in the field of security and crime prevention, soft targets protection and crisis management

# Activities

## Research and Development

- dissemination of research knowledge related to security and the environmental issues to its members
- sharing experience between universities, scientific and technical institutions;
- research and development within public administration institutions, business entities and non-profit organizations in order to share experience and best practices
- leading own research projects
- co-operation with other professional organizations and institutions

# Activities

## **Soft targets protection and crisis management**

We provide support to members of the crisis management structure of the Czech Republic, especially in the following areas:

- crisis management in the system of local governments
- emergency and disaster management
- designing buildings and public spaces in methodology of soft target protection
- crime prevention

# Activities

## Energy supply and critical infrastructure

We are aware of the key role of energy supply in the economy of the Czech Republic. Our experts provide a critical and conceptual view of the energy infrastructure, analyze current threats and risks in this field. The search for sustainable and ecological solutions is inevitable part of our project teams' philosophy.

We provide our partners with methodological support in the field of critical infrastructure management. Our experts' skills, based on their long term experience allows us to offer systematic solutions of unrivaled quality.

# Activities

## **Cyber security, digitization and personal data protection**

We provide methodical support and the transfer of experience in these areas.

Best practices from other EU member countries, expert opinions of EU working bodies and professional institutions are disseminated to our members in the field of legislative and educational activities.

Consultancy and conceptual support in cybersec and personal data protection are also available for our members.

# Activities

## Environment

We perceive a care for the environment as a necessary part of responsible management both in the field of state administration and local governments, as well as in the private sector.

Our expert teams cover a wide range of environmental topics from water management (including drinking water and waste water management), waste management to brownfield decontamination and other topics.

Compliance with EU legislation is provided and guaranteed by our expert teams in this field.

Analytical and research work is an integral part of our activities as well as cooperation with academic and other professional institutions in the EU and the Czech Republic.

# Partnership

- Become our partner or supporter and be part of a functioning network. You will get up to date information of relevant and important events within the EU and other candidate countries.
- **Partnership benefits**
- Joining a communication channel, sharing experience in the field of security studies, science and research
- Information service on outputs, planned events in the Czech Republic and abroad in cooperation with professional institutions and foreign embassies
